

AMENDMENTS TO THE CLAIMS

Claim 1 (Original) Harness suitable for use on watercraft comprising:

a basic element (10) coupled to said harness;

a hook (15), suitable for being hooked by a cable, coupled to said basic element (10);
characterised in that

said basic element (10) comprises a first piece (31) connected to said harness and of a second piece (30, 15), that can be disconnected from said first piece (31);

said first piece (31) is coupled to said second piece (30, 15) by means of coupling means (32) that can be slipped out.

Claim 2 (Original) Harness in accordance with any of the previous claims characterised in that said first piece (31) and said second piece (30, 15) are constituted of plates.

Claim 3 (Currently Amended) Harness in accordance with claim 1 ~~any of the previous claims~~ characterised in that said first piece (31) presents at least a hollow portion (50) in which at least one portion (51) of said second piece (30, 15) can be placed.

Claim 4 (Currently Amended) Harness in accordance with claim 1 ~~any of the previous claims~~ characterised in that said first piece (31) and said second piece (30, 15) present transversally a through hole (34) in which said hooking means (32) can be inserted.

Claim 5 (Original) Harness in accordance with claim 4 characterised in that said hooking means (32) consist of a pin that can be slipped out.

Claim 6 (Original) Harness in accordance with claim 5 characterised in that said pin that can be slipped out (32) is coupled to a handle (33, 70, 71, 72).

Claim 7 (Original) Harness in accordance with claim 5 characterised in that it comprises at least one guide track (61, 63) for slipping out said pin (32).

Claim 8 (Currently Amended) Harness in accordance with claim 1 ~~any of the previous~~

~~claims~~-characterised in that said hooking means (32) that can be slipped out are positioned in the upper part of first piece (31) and of said second piece (30, 15).

Claim 9 (Currently Amended) Harness in accordance with claim 1 ~~any of the previous~~ ~~claims~~-characterised in that between said first piece (31) and said second piece (30, 15) a spring (35) is positioned.

Claim 10 (Currently Amended) Harness in accordance with claim 1 ~~any of the previous~~ ~~claims~~-characterised in that said first piece (31) presents a tooth to which said second piece (30, 15) is engaged.

Claim 11 (Original) Harness in accordance with claim 10 characterised in that said tooth is positioned in the lower part of said first piece (31).

Claim 12 (Currently Amended) Harness in accordance with claim 1 ~~any of the previous~~ ~~claims~~-characterised in that said second piece (30) comprises said hook (15).

Claim 13 (Original) Harness in accordance with claim 12 characterised in that said hook (15), said first piece (31) and said second piece (30, 15) are made of steel.

Claim 14 (Currently Amended) Harness in accordance with claim 1 ~~any of the previous~~ ~~claims~~-characterised in that said harness is the trapezoidal type.

Claim 15 (New) Harness in accordance with claim 2 characterised in that said first piece (31) presents at least a hollow portion (50) in which at least one portion (51) of said second piece (30, 15) can be placed.

Claim 16 (New) Harness in accordance with claim 2 characterised in that said first piece (31) and said second piece (30, 15) present transversally a through hole (34) in which said hooking means (32) can be inserted.

Claim 17 (New) Harness in accordance with claim 3 characterised in that said first piece (31) and said second piece (30, 15) present transversally a through hole (34) in which said hooking means (32) can be inserted.

Claim 18 (New) Harness in accordance with claim 15 characterised in that said first piece (31) and said second piece (30, 15) present transversally a through hole (34) in which said hooking means (32) can be inserted.

Claim 19 (New) Harness in accordance with claim 16 characterised in that said hooking means (32) consist of a pin that can be slipped out.

Claim 20 (New) Harness in accordance with claim 17 characterised in that said hooking means (32) consist of a pin that can be slipped out.
